Demand balances with domestic hanks (except reciprocal balances and balances with private banks and American hranches of foreign banks), plus cash items in process of collection.

Reserves actually required are based on deposits at opening of husiness. The figures in this column, therefore, represent the reserves required to be maintained on the business day following the call date. The requirements as to reserves to be maintained by each member bank are as follows: Time deposits—5 percent for all member hanks; net demand deposits—18 percent for central Reserve city banks, 16½ percent for Reserve city hanks and 11 percent for country hanks.

The figures shown in this column are the differences between reserve halances reported by member banks on the call date and the reserves required to be maintained on the first business day following the call date. They are, therefore, merely approximations of the reserve position of member hanks.
